Professional Summary

Computer Science undergraduate with hands-on experience in data analysis, Python, SQL, and data visualization. Skilled in transforming complex datasets into actionable insights using tools like Pandas, Power BI, and Tableau. Experienced in data cleaning, exploratory data analysis (EDA), and building visual dashboards to support data-driven decision making.

Skills

- **Programming Languages:** Python, R, SQL
- **Data Analysis:** Pandas, NumPy, Data Cleaning, EDA
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Databases:** MongoDB, MySQL, SQLite
- **Version Control:** Git, GitHub
- **Core CS Concepts:** OOPS, DSA, CN, Database Management, OS, Agile Development, System Design, SDLC
- **Software Tools:** VS Code, Canva, Microsoft Office Suite (Word, Excel, PowerPoint)

Experience

Data Analyst Intern | *Mankind Pharma Pvt. Ltd* **Okhla, New Delhi|08/2025 – 02/2026**

- Automated time-series data preprocessing using Python, reducing manual workload by **40%**.
- Created reusable scripts for report generation, improving reporting efficiency
- Wrote optimized SQL queries and joins in MySQL to extract, aggregate, and validate large volumes of business data.
- Performed exploratory data analysis (EDA) on historical sales and inventory datasets to uncover seasonal demand patterns and business opportunities.
- Collaborated with cross-functional teams to understand business requirements and translate them into actionable analytical solutions.
- Gained practical experience in the **Software Development Life Cycle (SDLC)**, participating in code reviews and the migration of updates from Development to Production environments.

Projects

BMWSalesPerformanceDashboard| *Power Bi, Excel*

- Developed an interactive **Power BI dashboard** to analyze BMW sales performance across regions and product categories.
- Visualized key business metrics including **total revenue, sales trends, and top-selling models**.
- Implemented **dynamic filters and slicers** for region, time period, and product category to enable interactive analysis.
- Applied SQL concepts including joins, aggregations, GROUP BY, and filtering to organize and analyze sales data.
- Identified sales trends and performance insights to support data-driven decision making.

Customer Churn Analysis Dashboard | *Power BI, Excel, SQL*

- Developed an interactive customer churn dashboard in Power BI to analyze customer retention and attrition trends.
- Wrote SQL queries to analyze churn trends by customer tenure, contract type, payment method, and monthly charges.
- Identified that customers with month-to-month contracts and higher monthly charges had higher churn rates.
- Generated actionable insights to help improve customer retention and reduce customer attrition
- Created business-friendly visualizations to support decision-making and strategic planning.

Education

B. Tech Computer Science and Engineering Expected Graduation: 2026

Dronacharya College of Engineering, Gurgaon *CGPA: 7.8 / 10*

Awards & Certifications

- Machine Learning & Data Science Certification – Geeks for Geeks (Sep 2025)
- **Data Analysis with Python** – IBM (Sep 2025).
- Solved **150** problems across various topics, including algorithms, data structures, and DP.
